

FWAC FACT SHEET 1 - *Room Styling*

- 1.** Look at the room and find a focal point
- 2.** Start by picking your colours then go to the hardware store and pick up little colour swatches. Don't be afraid to be daring! (Note – colours at night will appear different than during the day. Therefore test your colour scheme during daylight and night time)
- 3.** Make sure you pick a colour combination that is easy to live with
- 4.** When you see a prop or furniture piece you like match it to the colour swatches
- 5.** Try to add textures around the room with cushions etc to add interest
- 6.** To give the room a cosy feeling consider adding a large shag rug for example, giving you somewhere to lie round
- 7.** Dress up pigeonhole units with items such as bowls, glasses, baskets and boxes in your chosen colour scheme
- 8.** Well priced home ware items, when positioned properly can look a million dollars
- 9.** Always keep your eyes open, you never know what you may find. It doesn't always need to be practical, aesthetics go a long way to the 'good vibe' of a room
